Fighter Aircraft Combat Debuts, 1915-1945 Jon Guttman, 2014 An International History of the Development Competition and Deployment of High Speed Maneuverable Fighter Aircraft During the Era of the World Wars Of all military aircraft fighter planes hold a mystique all their own Perhaps it is because fighters can afford the least compromise when the goal is to seize and maintain control of the air the confrontation is direct During World War I the concept of air superiority took hold and in the ensuing decades the development of fighter aircraft became an ongoing back and forth battle with adversaries trying to gain an upper hand through innovations in aerodynamics powerplants and armament

Fighter Aircraft Combat Debuts 1915 1945 Innovation in Air Warfare Before the Jet Age by prominent aviation expert Jon Guttman explores the first combats for a variety of fighters of World War I the conflicts of the so called interwar years and World War II a thirty year period that saw the birth of the fighter concept and its maturity on the threshold of the Jet Age Most of the aircraft described are fairly well known to aviation historians and a few names such as Sopwith Camel Fokker Triplane Messerschmitt Me 109 Mitsubishi Zero North American Mustang and Supermarine Spitfire are familiar even to the most nonaviation minded persons Not so well known are the circumstances of their combat debuts in which some such as the Zero made their mark almost from the outset but in which others like the British Bristol F 2A showed rather less promise than they would ultimately realize While a certain amount of space must be devoted to the technical development of these famous fighters these studies of first combats serve as a reminder that it is the human factor with all its special quirks that inevitably came into play when these deadly flying machines first fired their guns
