A unique collaboration between the celebrated management thinker and Fifth Discipline author Peter Senge and a team of renowned educators and organizational change leaders, *Schools that Learn* describes how schools can adapt, grow, and change in the face of the demands and challenges of our society and provides tools, techniques, and references for bringing those aspirations to life. The new revised and updated edition offers practical advice for overcoming the many challenges that face our communities and educational systems today. It shows teachers, administrators, students, parents, and community members how to successfully use principles of organizational learning, including systems thinking and shared vision, to address the challenges that face our nation's schools. Drawing on observations and advice from more than 70 writers and experts on schools and education, this book features methods for implementing organizational learning and explanations of why they work. Compelling stories and anecdotes from the field, classrooms, schools, and communities, charts, tables, and diagrams illustrate systems thinking and other practices. Guiding principles for how to apply innovative practices in all types of school systems, individual exercises useful for both teachers and students, team exercises to foster communication within the classroom, school, or community group, new essays on topics like educating for sustainability, systems thinking in the classroom, and the great game of high school, new recommendations for related books, articles, videotapes, and web sites, and more. *Schools That Learn* is the essential guide for anyone who cares about the future of education and keeping our nation's schools competitive in our fast-changing world.
