Forgotten Realms Atlas:

The Forgotten Realms Atlas Karen W. Fondstad, 1990 *The Atlas Of Middle-Earth* Karen Wynn Fonstad, 2014-06-10

Karen Wynn Fonstad's *THE ATLAS OF MIDDLE EARTH* is an essential volume that will enchant all Tolkien fans. Here is the definitive guide to the geography of Middle-earth from its founding in the Elder Days through the Third Age, including the journeys of Bilbo Frodo and the Fellowship of the Ring. Authentic and updated, nearly one-third of the maps are new, and the text is fully revised. The atlas illuminates the enchanted world created in *THE SILMARILLION*, *THE HOBBIT*, and *THE LORD OF THE RINGS*. Hundreds of two-color maps and diagrams survey the journeys of the principal characters day by day, including all the battles and key locations of the First, Second, and Third Ages. Plans and descriptions of castles, buildings, and distinctive landforms are given, along with thematic maps describing the climate, vegetation, languages, and population distribution of Middle-earth throughout its history. An extensive appendix and an index help readers correlate the maps with Tolkien's novels.

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14

Mark J.P. Wolf's study of imaginary worlds theorizes world building within and across media, including literature, comics, film, radio, television, board games, video games, the Internet, and more. *Building Imaginary Worlds* departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves. Wolf argues that imaginary worlds, which are often transnarrative, transmedial, and transauthorial in nature, are compelling objects of inquiry for Media Studies. Chapters touch on a theoretical analysis of how world building extends beyond storytelling, the engagement of the audience, and the way worlds are conceptualized and experienced. A history of imaginary worlds that follows their development over three millennia, from the fictional islands of Homer's *Odyssey* to the present, internarrative theory examining how narratives set in the same world can interact and relate to one another, an examination of transmedial growth and adaptation, and what happens when worlds make the jump between media, an analysis of the transauthorial nature of imaginary worlds, the resulting concentric circles of authorship, and related topics of canonicity, participatory worlds, and subcreation's relationship with divine Creation. *Building Imaginary Worlds* also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1,400 imaginary worlds, listing their names, creators, and the works in which they first appeared.

Rethinking the Power of Maps Denis Wood, 2010-04-16

A contemporary follow-up to the groundbreaking *Power of Maps*, this book takes a fresh look at what maps do, whose interests they serve, and how they can be used in surprising, creative, and radical ways. Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators. He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter-mapping practices today. Thought-provoking illustrations include U.S. Geological Survey maps, electoral and transportation maps, and numerous examples of critical cartography, participatory GIS, and map art.
