

# FIRE CLUES

**Point of Origin – Burn patterns and other damage can help determine the point of origin, or the location where the fire started.**

**Char Patterns – Created by very hot fires that burn very quickly and move fast along its path, so that there can be sharp lines between what is burned and what isn't.**

- A char pattern on a door would help an investigator determine which side of the door the fire was on.
- A char pattern on the floor would help investigators determine the use of an accelerant and its path.

**V-Patterns - Fire burns up, in a V-shaped pattern, so a fire that starts at an outlet against a wall leaves a char pattern that points to the origin.**

- A very narrow V-shape might indicate a fire that was hotter than normal, such as one helped along by an accelerant.
- A wide V-shape might indicate a fire that was slow burning.

A U-shape could indicate that there was a "pool of origin" rather than a point of origin, such as might be caused by, say, a puddle of gasoline.
