## Step 1: CHOOSING A BREED

**Heritage Breeds:**  
A natural breeding chicken that has a slow growth and can live a long productive outdoor life.

**Egg Laying Breeds:**  
These hens have been bred to produce large quantities of eggs the large their share of production lifetime.

**Dual Purpose Breeds:**  
These hens are the best of both worlds in terms of utility. They are layers and meat birds.

**Meat Breeds:**  
As the name suggests, these breeds are bred for meat. They grow very, very quickly.

## Step 2: GETTING YOUR CHICKENS

When you get chickens for the first time you have a few different choices:

**Hatching Eggs:**  
These are fertilized eggs that you need to incubate. If you are new to raising chickens, you should avoid this method if you hatch eggs unless you have experience from other animals.

**Chicks:**  
This is the most used and wisest choice for novices. You can select which breeds you want and when you want them. You typically get chicks at one day old.

**Pullets:**  
Pullets are birds aged between four to six months. The chicks have to mature and lay their first egg at the age of lay, meaning the pullet is about to lay her first egg at the age of lay.

**Adults:**  
Adult hens are more difficult to come by as breeders like to move birds out before they get too old since they eat more. A common source of adult hens is animal shelters or

## Step 3: PREPARING THE CHICKEN COOP

## Step 4: PREPARING FOR CHICKS

Anything with baby chicks is always an exciting time! However, there are several things you need to prepare before your chicks arrive:

- \_\_\_\_\_ Brooder
- \_\_\_\_\_ Heat Source
- \_\_\_\_\_ Drinker
- \_\_\_\_\_ Feeder
- \_\_\_\_\_ Food
- \_\_\_\_\_ Bedding
- \_\_\_\_\_ Vitamins

## Step 5: COMMON CHICKEN PROBLEMS

**Molting:**  
This is the process of shedding old and worn feathers and growing new feathers. It can be stressful for the chicken and you should keep them warm and protected during this time.

**Overheating:**  
Chickens do not have sweat glands. They cool themselves by panting and spreading their wings. They will seek shade and water if they are overheating.

**Broodiness:**  
You will know it when you see it! The hen will sit on the ground and peck at the ground. She will be very protective of her nest and will not let you near it. This is a natural instinct and you should respect it.

**Staying:**  
This is a common problem for chickens. It is caused by a parasite that lives in the intestines. The chicken will have a runny stool and will lose weight. You should consult a veterinarian if you see this problem.
