Imaging in Advertising Fern L. Johnson, 2008 The dominance of advertising in everyday life carries potent cultural meaning As a major force in the rise of image based culture advertising spreads images that shape how people live their lives While scholarship on visual images has advanced our understanding of the role of advertising in society for example in revealing how images of extremely thin female models and athletic heroes shape ideals and aspirations images circulated through language codes or verbal images in advertising have received less attention Imaging in Advertising explores how the verbal and visual work together to build a discourse of advertising that speaks to audiences and has the power to move them to particular thoughts and actions In this book Fern L Johnson presents a series of case studies exploring important advertising images racial connotations in cigarette advertising representations of cultural diversity in teen television commercials metaphors of the face appearing in ads for skin care products language borrowed from technology to sell non

technology products and the illusion of personal choice that is promoted in many Internet web sites Johnson argues that examining the interplay of verbal and visual images as a structured whole exposes the invasive role of advertising in shaping culture in 21st century America *Current Research on Gender Issues in Advertising* Yorgos Zotos, Stacy Grau, Charles R. Taylor, 2018-12-14 Gender stereotypes are general beliefs about sex linked traits and roles psychological characteristics and behaviors all of which contribute towards describing women and men Gender role stereotyping in advertising has been a critical topic since the 1970s and there is a long lasting debate between advertisers and sociologists about the role and the social nature of advertising Although changing role structures in the family and the labor force have brought significant variation in both male and female roles it has been noted that there is a cultural lag in advertising where men and women were for a long period of time depicted in more traditional roles This book extends the research on gender stereotypes in advertising over the past 20 years highlighting key themes such as attitude towards sex and nudity in advertising women in decorative roles the changing roles of women and men in advertising and the viewpoints of those advertising professionals who design campaigns This book was originally published as a special issue of the International Journal of Advertising
