A Small Matter of Programming Bonnie A. Nardi,1993-07-15 A Small Matter of Programming asks why it has been so difficult for end users to command programming power and explores the problems of end user driven application development that must be solved to afford end users greater computational power Drawing on empirical research on existing end user systems A Small Matter of Programming analyzes cognitive social and technical issues of end user programming In particular it examines the importance of task specific programming languages visual application frameworks and collaborative work practices for end user computing with the goal of helping designers and programmers understand and better satisfy the needs of end users who want the capability to create customize and extend their applications software The ideas in the book are based on the author s research on two successful end user programming systems spreadsheets and CAD systems as well as other empirical research Nardi concentrates on broad issues in end user programming especially end users strengths and problems introducing tools and techniques as they are related to higher level user issues Bonnie A Nardi is a Member of the Technical Staff at Hewlett Packard Laboratories **Advanced Topics in End User Computing,**

*Antecedents and Outcomes of End User Computing Competence* David A. Case,2003-03-01 The tremendous proliferation of end user computing EUC in the workplace over the past few decades is cause for concern in public and private organizations Computer use has moved from individuals working with dumb terminals in centralized networks to individuals operating personal computers just as powerful as yesterday s mainframe The end user has had to evolve and will continue evolving as well from someone with low level technical skills to someone with a high level of technical knowledge and information managerial skills Because EUC continues growing more sophisticated end users must not only maintain a level of competence but prepare for the next generation of computing technology Doing so will enable organizations to continue enjoying the positive benefits of EUC success Research indicates that EUC success may depend on end user competence Using Structural Equation Modeling SEM to test an integrated model of EUC success the results of this study show that computer training education level beliefs about computer systems and the ability to operate them lead to end user computing competence Additionally results show that computer system use a factor in achieving EUC success is an outcome of end user computing competence The overall conclusions drawn from this study is that the Air Force organization may be able to improve its efforts to successfully use computing technology however it appears individual personnel have the competence to do so already There may be

additional underlying factors contributing to the lack of significant computing success the discovery of which is a prospect for future research

Rockart, 2015-08-05 Excerpt from The Management of End User Computing A Research Perspective Based on interviews with 200 end users and 50 information systems managers concerned with end user computing end users can be classified into six distinct types Each

of them needs differentiated education support and control from the Information Systems function End users exist primarily in staff functions They develop and use a wide spectrum of computing applications ranging from operational systems of the type usually developed by information systems professionals to complex analytical programs To support a large number of their applications a new computing environment the third environment in addition to the traditional COBOL and timesharing environments must be developed by Information Systems I S management Close attention must also be paid by I S management to the need to involve functional support personnel end users in each functional area who spend most of their time programming and aiding other end users in the I S end user management process An end user strategy is needed in each organization In addition users cite increasing needs for support from I S management Finally a new type of control process is necessary if end user computing is to be well managed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
