## **Fight For Air Power 2nd Edition:**

**Air Power and War Rights** James Molony Spaight, 1924 *Military Strategy, Joint Operations, and Airpower* Ryan Burke, Michael Fowler, Jahara Matisek, 2022 *Military Strategy Joint Operations and Airpower* introduces students to contemporary strategy and the operational level of war particularly as it relates to airpower. Developed as foundational reading for all US Air Force Academy cadets, this intermediate textbook is designed to close the gap between military theory and practice. It covers strategic foundations, operational design, and joint service operations, the air space, and cyber capabilities that comprise modern airpower and contemporary challenges in the application of strategy. In this second edition, each chapter has been updated and revised, and several sections have been expanded. Part II, Military Forces and the Joint Fight, is now has separate chapters about each service in addition to a chapter on joint structure. Similarly, operational design is expanded from one to four chapters to provide a more thorough step by step guide through the process. New chapters in this second edition include Integrating the Instruments of Power, The Spectrum of Conflict and Range of Military Operations, and The Nuclear Weapons Triad and Missile Defense. This book's contributing authors and editors include both military practitioners and scholars of security studies, political science, and history. In addition to being required reading for Air Force cadets and ROTC students, the book will provide an essential overview of strategy and practice for anyone interested in modern airpower.

*Airpower Applied* John Andreas Olsen, 2017-05-15 *Airpower Applied* reviews the evolution of airpower and its impact on the history of warfare. Through a critical examination of twenty-nine case studies in which various US coalitions and Israel played significant roles, this book offers perspectives on the political purpose, strategic meaning, and military importance of airpower. By comparing and contrasting more than seventy-five years of airpower experience in very different circumstances, readers can gain insight into present-day thinking on the use of airpower and on warfare. The authors, all experts in their fields, demystify some of airpower's strategic history by extracting the most useful teachings to help military professionals and political leaders understand what airpower has to offer as a continuation of politics by other means. The case studies emphasize the importance of connecting policy and airpower; operational effectiveness cannot substitute for poor statecraft. As the United States, its allies, and Israel have seen in their most recent applications of airpower, even the most robust and capable air weapon can never be more effective than the strategy and policy it is intended to support.

**Fighting from Above** Brian D. Laslie, 2024-03-19 The story of the United States Air Force (USAF) stretches back to aerial operations prior to the First World War, well before the USAF became a separate service and looks forward to a new era of airpower in space. *Fighting from Above* presents a concise account of this expansive history, offering a new perspective on how the air forces of the United States created an independent way of warfare over time. From the earliest battles of the USAF's predecessor organizations to its modern incarnation, Brian D. Laslie identifies four distinct and observable ways of war that developed over four distinct epochs. Beginning with the development of early air power in 1906-1914, he highlights the

creation of roles and missions with bombardment theory and practice ascendant An era of strategic dominance 1942 1975 followed in which the ideas of strategic bombardment ruled the air force when such notions were unceremoniously proven false during the Vietnam era conflicts a period of tactical ascendancy 1975 2019 began Finally Laslie considers the current environment where much of the story of the USAF remains unwritten as it grapples with the prospects and challenges posed by drones and the U S Space Force While detailing combat operations Fighting from Above also pays close attention to technology politics rivalries logistics policy organization equipping and training Thorough concise and innovative in its approach it is an authoritative exceptionally readable history of the development of American airpower Allied Fighting Effectiveness in North Africa and Italy, 1942-1945 ,2014-05-15 Allied Fighting Effectiveness in North Africa and Italy 1942 1945 offers a collection of scholarly papers focusing on heretofore understudied aspects of the Second World War Encompassing the major campaigns of North Africa Sicily and Italy from operation TORCH to the end of the war in Europe this volume explores the intriguing dichotomy of the nature of battle in the Mediterranean theatre whilst helping to emphasise its significance to the study of Second World War military history The chapters written by a number of international scholars offer a discussion of a range of subjects including logistics the air land battle coalition operations doctrine and training command control and communications and airborne and special forces Contributors are Matthew C Ford Simon Godfrey John Greenacre Andrew L Hargreaves James Hudson Alan Jeffreys Kevin Jones Paul Lemaire Ross Mahoney Christopher Mann Cesar Campiani Maximiano Patrick J Rose and Grant T Weller **Air University Library Index to Military Periodicals** ,1995 **The Fighting Forces** ,1926 New Challenges for Defense Planning Paul K. Davis,1994 This book is a collection of essays by senior defense analysts at RAND all of whom have been deeply involved in post Cold War defense planning studies for the Department of Defense The essays cover a wide spectrum of issues including alternative strategies and structures for defense planning conventional deterrence of Third World opponents modernizing weapon systems and force structures and planning under uncertainty a major theme of the book as a whole Some of the essays are sympathetic to current U S methods and policies whereas others are critical arguing that radical changes are needed Taken as a whole the book provides a provocative cross section of work by experts who understand both the theoretical issues and the practical considerations that the Department of Defense must address The book will be of interest to policymakers students of defense planning and other readers seeking to understand the challenges and choices confronting defense planners as we approach the end of the century **Air Power in the Age of Total War** John Buckley,2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power This work assesses the role of air power in changing the face of battle on land and sea Utilizing late 1990s research the author demonstrates that the phenomenon of air power was both a cause and a crucial accelerating factor contributing to the theory and practice of total war For instance the expansion of warfare to the

homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status In addition the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined This work should provide students of international history war studies defence and strategic studies with an insight into 20th century warfare **Fighting with the Soviets** Mark J. Conversino,1997 Conversino s story is as interesting as it is unfamiliar and succeeds in opening up Frantic s many dimensions including the personal as well as the political strategic and operational His revelations regarding the interactions between American servicemen and Ukrainian Russians are especially valuable and underscore the immense difficulties of implementing alliances at the grass roots level Dennis Showalter author of Tannenberg Clash of Empires **Subject Guide to Books in Print** ,1993 **Army and Navy Journal** ,1925 **Airpower Journal** ,1998 **Chambers's Encyclopedia** ,1967 *Aeronautical Digest* ,1938 **Journal of the Aeronautical Sciences** ,1940 *Paperbound Books in Print* ,1992 *The Bookseller* ,1917 **The Publishers' Circular and Booksellers' Record** ,1909 **Chambers's Encyclopædia** Ephraim Chambers,1955
