Graphics And Robotics:

Graphics and Robotics Wolfgang Straßer, Friedrich M. Wahl, 2012-12-06 Problems common to graphics and robotics are covered in this reviewed selection of papers written following a 1993 workshop. Leading experts from both disciplines met to identify common problems to present new solutions and to discuss future research directions. Topics covered include robot simulation using graphics workstations, simulation concepts in the framework of teleoperation, path planning strategies, collision detection techniques, experimentation using virtual reality, modeling techniques for automated programming and for objects with curved surfaces, object oriented implementations, various aspects of robot vision, and in a paper that reflects the essence of the workshop, the challenging task of designing a vision system for a domestic robot.

Geometric Computing in Computer Graphics and Robotics Using Conformal Geometric Algebra Dietmar Hildenbrand, 2006

CAD Based Programming for Sensory Robots Bahram Ravani, 2012-12-06 This book contains 26 papers presented at the NATO Advanced Research Workshop on CAD Based Programming for Sensory Robots held in IL CIOCCA Italy July 4-6 1988. CAD based robot programming is considered to be the process where CAD Computer Based models are used to develop robot programs. If the program is generated at least partially by a programmer interacting for example with a computer graphical display of the robot and its work environment, the process is referred to as graphical off line programming. On the other hand, if the robot program is generated automatically for example by a computer, then the process is referred to as automatic robot programming. The key element here is the use of CAD models both for interactive and automatic generation of robot programs. CAD based programming therefore brings together computer based modeling and robot programming and as such cuts across several disciplines including geometric modeling, robot programming, kinematic and dynamic modeling, artificial intelligence, sensory monitoring, and so on.
