Great Architecture Of The World:

World's Greatest Architect William J. Mitchell, 2008-08-01 Function and meaning in architecture and elsewhere from tongue in cheek instructions for creating a surveillance state to reflections on the architecture of the potato chip World's Greatest Architect Making Meaning and Network Culture Artifacts including works of architecture play dual roles they simultaneously perform functions and carry meaning Columns support roofs but while the sturdy Tuscan and Doric types traditionally signify masculinity the slim and elegant Ionic and Corinthian kinds read as feminine Words are often inscribed on objects On a door push or pull Today information is digitally encoded dematerialized and displayed rematerialized to become part of many different objects at one moment appearing on a laptop screen and at another perhaps on a building facade as in Times Square Well designed artifacts succeed in being both useful and meaningful In World's Greatest Architect William Mitchell offers a series of snapshots short essays and analyses that examine the systems of function and meaning currently operating in our buildings cities and global networks In his writing Mitchell makes connections that aren't necessarily obvious but are always illuminating moving in one essay from Bush Cheney's abuse of language to Robert Venturi's argument against rigid ideology and in favor of graceful pragmatism He traces the evolution of Las Vegas from Sin Sign City to family friendly resort and residential real estate boomtown A purchase of chips leads not only to a complementary purchase of beer but to thoughts of Eames chairs like Pringles and Gehry fun to imitate with tortilla chips in refried beans As for who the world's greatest architect might be here's a hint he's also the oldest
