Psychoanalytic Explorations into the Primal

Relationship in Japan and India Osamu Kitayama, Jhuma Basak, 2025-07-10 In this landmark collaboration Osamu Kitayama and Jhuma Basak chronicle their long standing collaboration and cultural exchange to survey the importance of familial relationships in Japan and India exploring primal relations through a cross cultural psychoanalytic lens Divided into three sections Psychoanalytic Explorations into the Primal Relationship in Japan and India looks at each country's perception of parenthood and approach to raising children in turn before concluding in an illuminating dialogue between the two authors Kitayama explores the maternal figure within the mother child relationship with a focus on the mother son dyad as well as relationships between parents He considers in depth how Japanese culture can often exclude what is perceived as alien delving into its rich tapestry of folklore to understand underlying mental scripts which can shape collective perceptions societal norms and expectations each of which can pose an issue to healthy familial relationships Basak's response draws from Indian socio cultural and mythological contexts as well as clinical applications to provide psychoanalytic insight into the stark differences and similarities between attitudes in Japan India and the eastern culture at large Both authors join together to highlight different child rearing practises such as co sleeping and how they can shape human sexuality subjectivity Challenging the standardisation of the Oedipal myth the book draws from literary and clinical examples in Japan and India to invite the reader into another world of parenting style and another idiom of psychoanalysis Uniquely positioned to develop understanding of how psychoanalysis has developed in non Western countries this book is an essential resource for psychoanalysts in training and in practice

Japan Report, 1971 *The Web*, 1981 **The Mythology of All Races** ... Louis Herbert Gray, George Foot Moore, John Arnott MacCulloch, 1928 **The Iowa Engineer**, 1926 *Tale of Two Cranes* Nathaniel Gronewold, 2023-09-08 It s been 50 years since the United States attempted a conservation revolution with the passing of the Endangered Species Act in 1973 Now fifty years later the Fish and Wildlife Service finds itself at a crossroads some recovery efforts are succeeding but too many are either failing or stuck in neutral even after decades of work Take for example the story of two cranes the whooping crane of southeastern Texas and the red crowned crane of northern Japan Both were pushed to the brink of extinction by the early 1900s with surviving populations numbering as few as 20 to 40 individuals and are now the subjects of concerted recovery efforts led by advanced national governments The U S Fish and Wildlife Service has focused mainly on habitat protection while at Japan s Ministry of the Environment conservation authorities have leaned most heavily on direct population survival via a long standing winter feeding program These two case studies provide a template for comparing different approaches towards endangered species habitat management vs population management Thus far the Japanese approach has proved more successful but the story isn t over yet What can these lessons teach us about managing other endangered species Can species rehabilitation be standardized or must each effort be designed and implemented on a case by case basis A Tale of Two Cranes will serve as a launching pad for better understanding the progress and pitfalls inherent in endangered species management through 50

years of lessons learned since the landmark Endangered Species Act was enacted by the United States Congress in December 1973 Also considering its success stories like the Attwater s prairie chicken the ESA has had an enormous impact on conservation theory and practice throughout the world from Tasmanian devils in Australia to the vaquita porpoises of Mexico But worsening government budget constraints public inattention and a continuous string of setbacks experienced within numerous rehabilitation initiatives will all eventually conspire to challenge the conventional thinking on endangered species management like never before Author Nathaniel Gronewold explains how we got here where things stand today and what lessons conservationists must take to heart as the world continues to struggle to put a halt to an ongoing global extinction crisis
