This machine is a compact electric oven that contains a single large tin of bread inside. The tin itself is a bit special; it has an axle at the bottom connected to an electric motor underneath. The recipe ingredients are added to the baking pan of the machine in the exact order indicated and in the chosen cycle. The machine mixes and kneads the bread dough, makes it rest and leavens for the first time, then moves on to the second leavening and finishes by baking the bread in the machine. The complete cycles can vary from two to three hours; many machines have a countdown timer. The dough setting machines allow you to remove the bread dough at the end of the shortest cycle, first leavening, where you can then shape it manually, set the leavening, and complete the bread baking process in the oven of your range. A dough cycle is an essential feature if you prefer bread baked in the bread machine's oven rather than in the baker's oven. This book includes tried and tested keto bread and other baked goods recipes to help promote weight loss, increase energy, and suppress your hunger.
