

GOD'S UTILITY FUNCTION

Richard Dawkins

Chapter from *River Out of Eden*

My clerical correspondent of the previous chapter found faith through a wasp. Charles Darwin lost his with the help of another: "I cannot persuade myself," Darwin wrote, "that a beneficent and omnipotent God would have designedly created the Ichneumonidae with the express intention of their feeding within the living bodies of Caterpillars." Actually Darwin's gradual loss of faith, which he downplayed for fear of upsetting his devout wife Emma, had more complex causes. His reference to the Ichneumonidae was aphoristic. The macabre habits to which he referred are shared by their cousins the digger wasps, whom we met in the previous chapter. A female digger wasp not only lays her egg in a caterpillar (or grasshopper or bee) so that her larva can feed on it but, according Fabre and others, she carefully guides her sting into each ganglion of the prey's central nervous system, so as to paralyze it but not kill it. This way, the meat keeps fresh. It is not known whether the paralysis acts as a general anesthetic, or if it is like curare in just freezing the victim's ability to move. If the latter, the prey might be aware of being eaten alive from inside but unable to move a muscle to do anything about it. This sounds savagely cruel but, as we shall see, nature is not cruel, only pitilessly indifferent. This is one of the hardest lessons for humans to learn. We cannot admit that things might be neither good nor evil, neither cruel nor kind, but simply callous-indifferent to all suffering, lacking all purpose.

Gods Utility Function:

God's Utility Function Richard Dawkins,1995-12-22 **The Question of God** Michael Palmer,2001 This invaluable text introduces the six great arguments for the existence of God It requires no specialist knowledge of philosophy and includes a wealth of primary sources from classic and contemporary texts **Oracles of Science** Karl Giberson,Mariano Artigas,2006-12-28 Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles **River Out of Eden** Richard Dawkins,2008-08-04 How did the replication bomb we call life begin and where in the world or rather in the universe is it heading Writing with characteristic wit and an ability to clarify complex phenomena the New York Times described his style as the sort of science writing that makes the reader feel like a genius Richard Dawkins confronts this ancient mystery **Nietzsche and Theology** David Deane,2006 This book outlines a model for incorporating Nietzschean thought within the structures of a wholly traditional Christological anthropology What is perhaps even more significant is what shows up in Christological anthropology under this Nietzschean light Using Nietzschean concepts a whole new lexicon is opened up for understanding and articulating traditional accounts of sin and fallenness accounts which modern theology has often lacked the categories to articulate **Nature Alive** Adam Scarfe,2018-04-18 This volume pays homage to Alfred North Whitehead s 1861 1947 profound lecture and essay entitled Nature Alive which was one of his most mature expressions of his process relational metaphysics a holistic conceptual framework that renders vivid the dynamic character of the natural world and the intrinsic purposiveness selective agency and creativity of living organisms Inspired by but not beholden to Whitehead s process metaphysical lens the contributors to this volume bring a multiplicity of philosophical orientations to the table in challenging the mechanistic and reductionistic neo Darwinian paradigm that is still dominant today in the life sciences Mechanistic neo Darwinism views nature and living organisms as machines namely as networks of externally related and linear causal switches dials levers pulleys and gears that are at the ready for technological and biotechnological manipulation Seeking a conceptual framework and a language that are more adequate to the study of the natural world and of living creatures than the mechanistic orientation the contributors to this volume explore several of the New Frontiers of Biology which are areas of biology whose findings to some extent go beyond the explanatory confines of the Modern Synthesis of natural selection and genetics Most notably emergence

theory the theory of organic selection epigenetics homeostasis chronobiology and autopoiesis research can provide us with key insights that can assist us in explaining how living agents emerged including the evolutionary origins of mentality consciousness and mind Moreover attention to the New Frontiers of Biology can serve to re enchant our understanding of the natural world and to prevent ecological devastation through a restoration to objectivity of notions such as intrinsic purposiveness selective agency creativity and intrinsic value **Journal of Economic Theory** Karl Shell, Jess

Benhabib, 2003 God Victor J. Stenger, 2007 By using five principle conditions for evaluating extraordinary claims Stenger treats the existence of God like any other scientific hypothesis stipulating that God should be detectable by scientific means given that he is supposed to play a central role in the operation of the universe and in the lives of humans BOOK JACKET

The Political Economy of Theocracy Mario Ferrero, Ronald Wintrobe, 2009-03-15 This book consists of essays by leading scholars in economics and political science which try deepen our understanding of how theocratic regimes behave by providing up to date empirical surveys by leading scholars of the economic performance of Iran and of Muslim countries in general and by looking at the behavior of historical theocracies **Biocosm** James N. Gardner, 2003 Publisher s description Biocosm challenges both sides of the controversy over evolution and creationism This carefully reasoned book proposes that life and intelligence have not emerged as a series of random accidents as Darwinists like Stephen Jay Gould have maintained but are hardwired into the cycle of cosmic creation evolution death and rebirth Gardner s theory of an exponential coevolution of biological and electronic intelligence designed and directed offers an extraordinary vision of a universe of point and purpose

Study Guide [to Accompany] Microeconomic Theory, Basic Principles and Extensions, Ninth Edition [by] Walter Nicholson Walter Nicholson, David C. Stapleton, 2005 *Examining God's Utility Function: why Nature Knows how to Manage Renewable Resources But Humans Might Not* A. P. Gutierrez, Uri Regev, David Zilberman, 1998 The Food of Love Christopher R. Campling, 1997 This book is for people who love music and have a religious faith It explores ways in which each of these dimensions of life can illuminate and strengthen the other *Cooking for the Gods* Pika Ghosh, 1995 *Cooking for the Gods* focuses on the special role of women in this domestic Hindu Bengali realm as they care for both their family and the numerous household deities who reside in the home shrine and partake of the cooked offerings

Intelligent Design Robert M. Baird, Stuart E. Rosenbaum, 2007-07-31 On December 20 2005 Federal District Court Judge John E Jones III ruled that Intelligent Design was not science but an unconstitutional intrusion of religion into the school curriculum His decision upheld contentions by parents in the Dover PA school district that school board members substituted personal religious beliefs for science The ruling came despite calls by President George W Bush for Intelligent Design to be taught as a theory alongside the theory of evolution This hotly contested issue continues to grip the nation and spark intense debate But what is Intelligent Design Can Intelligent Design stand up to the rigors of scientific method Or is it a nonscientific faith inspired interpretation of experience This collection of essays addresses such questions and includes

analyses from scientists journalists philosophers and religious leaders and thinkers This volume provides a variety of perspectives in the hope that readers will be better prepared to reach their own conclusions about the issues involved Divided into five sections the first section provides analyses of Judge Jones s decision Section two includes a report on and a response to President Bush s call for Intelligent Design to be taught in schools The third section outlines the origins of the debate including excerpts from the classic works of Charles Darwin and theologian William Paley Section four analyzes the scientific validity of Intelligent Design and includes statements from key scientific associations The highly important concluding section asks whether religion and evolution are compatible This essential volume features selections from Elisabeth Bumiller Matt Cartmill Charles Darwin Daniel C Dennett Barbara Forrest Owen Gingerich Stephen Jay Gould John Paul II Philip Kitcher Ernan McMullen Kenneth R Miller Nancey Murphy William Paley Robert T Pennock Holmes Rolston III Michael Ruse Alfred Tauber Michael W Tkacz James Q Wilson and Carl Zimmer **The God-experience** Evelyn Leigh Mudge,1923 **Through Man to God** George Angier Gordon,1906 **God and Tommy Atkins** Alexander Irvine,1918 *New Scientist* ,1996 *The Knowledge of God and Its Historical Development* Henry Melvill Gwatkin,1918
