Animals ,1911 ANIMAL BEHAVIOUR
Dr.RaniBai,2026-01-21 The Animal Dialogues Craig Childs,2007-12-12 From one of the finest nature writers at work in America today a lyrical dramatic illuminating tour of the hidden domain of wild animals Whether recalling the experience of

being chased through the Grand Canyon by a bighorn sheep swimming with sharks off the coast of British Columbia watching a peregrine falcon perform acrobatic stunts at 200 miles per hour or engaging in a tense face off with a mountain lion near a desert waterhole Craig Childs captures the moment so vividly that he puts the reader in his boots Each of the forty brief compelling narratives in *The Animal Dialogs* focuses on the author's own encounter with a particular species and is replete with astonishing facts about the species behavior habitat breeding and lifespan But the glory of each essay lies in Childs's ability to portray the sometimes brutal beauty of the wilderness to capture the individual essence of wild creatures to transport the reader beyond the human realm and deep inside the animal kingdom

Animal Places Jacob Bull, Tora Holmberg, Cecilia Åsberg, 2017-11-22 Nonhuman animals are ubiquitous to our human societies Interdisciplinary human animal research has for 50 years drawn attention to how animals are ever present in what we think of as human spaces and cultures Our societies are built with animals and through all kinds of multispecies interactions From public spaces and laboratories to homes farms and in the wilderness human and nonhuman animals meet to make space and place together through webs of power relations However the very spaces of these interactions are not mute or passive themselves The spaces where species meet matter and shape human animal relations This book takes as its starting point the relationship between place and human animal interaction It brings together the work of leading scholars in human animal studies from a variety of disciplinary and interdisciplinary backgrounds With a distinct focus on place physical space and biocultural geography the authors of this volume consider the ways in which space human and nonhuman animals co constitute each other how they make spaces together produce meaning around them struggle over access how these places are storied and how stories of spaces matter Presenting studies thematically and including a variety of nonhuman creatures in a range of settings this book delivers new understandings of the importance of nonhuman animals to understandings of place and the role of places in shaping our interactions with nonhuman creatures As pets as laboratory animals as exhibits as parasites as livestock as quarry as victims of disaster or objects of folklore this book offers insights into human animal intermingling at locales and settings of great relevance to many areas of research including geography sociology science and technology studies gender studies history and anthropology This book meets the evolving interest in human animal interaction anthrozoology and the environmental humanities in relation to the research on space and place that currently informs the humanities and the social sciences

Ethopharmacology of Agonistic Behaviour in Animals and Humans B. Olivier, J. Mos, P.F. Brain, 2012-12-06 Aggression research is in a rapid state of development The accelerating knowledge of neurotransmitter systems in the brain their behavioural functions and the development of drugs which may specifically affect systems related to attack and defence is fruitfully combined with studies in which basic ethological observation and quantification techniques are used more routinely Moreover much of the experimental effort has finally applied some order to the initial chaos which afflicted the various experimental aggression models used in pharmacological physiological and

ethological research This highly desirable trend not only leads to a better understanding of the phenomena studied and the terminologies employed but it increases our awareness of the multiplicity of factors that are important making it difficult to allow over hasty and simple generalizations This book is a compilation of studies presented at the International Society for Research on Aggression meeting in Chicago 1986 in which leading investigators were invited to cover aspects of ethopharmacological aggression research in a wide variety of species including studies on humans The level to which ethological techniques have been incorporated into the various areas of research differs as well as the knowledge and understanding of the neurotransmitter and experimental drug action on brain functioning in mammalian species This naturally results in data which are not always easy to compare or to extrapolate between species but useful indicators are starting to emerge
