Databricks Certified Associate Developer for Apache Spark Using Python Saba Shah, 2024-06-14 Learn the concepts and exercises needed to confidently prepare for the Databricks Associate Developer for Apache Spark 3.0 exam and validate your Spark skills with an industry recognized credential Key Features Understand the fundamentals of Apache Spark to design robust and fast Spark applications Explore various data manipulation components for each phase of your data engineering project Prepare for the

certification exam with sample questions and mock exams Purchase of the print or Kindle book includes a free PDF eBook
Book Description Spark has become a de facto standard for big data processing Migrating data processing to Spark saves
resources streamlines your business focus and modernizes workloads creating new business opportunities through Spark s
advanced capabilities Written by a senior solutions architect at Databricks with experience in leading data science and data
engineering teams in Fortune 500s as well as startups this book is your exhaustive guide to achieving the Databricks
Certified Associate Developer for Apache Spark certification on your first attempt You ll explore the core components of
Apache Spark its architecture and its optimization while familiarizing yourself with the Spark DataFrame API and its
components needed for data manipulation You ll also find out what Spark streaming is and why it s important for modern
data stacks before learning about machine learning in Spark and its different use cases What s more you ll discover sample
questions at the end of each section along with two mock exams to help you prepare for the certification exam By the end of
this book you ll know what to expect in the exam and gain enough understanding of Spark and its tools to pass the exam You
ll also be able to apply this knowledge in a real world setting and take your skillset to the next level What you will learn
Create and manipulate SQL queries in Apache Spark Build complex Spark functions using Spark s user defined functions
UDFs Architect big data apps with Spark fundamentals for optimal design Apply techniques to manipulate and optimize big
data applications Develop real time or near real time applications using Spark Streaming Work with Apache Spark for
machine learning applications Who this book is for This book is for data professionals such as data engineers data analysts BI
developers and data scientists looking for a comprehensive resource to achieve Databricks Certified Associate Developer
certification as well as for individuals who want to venture into the world of big data and data engineering Although working
knowledge of Python is required no prior knowledge of Spark is necessary Additionally experience with Pyspark will be
beneficial
