*Forgotten Peoples* Edward S. Rogers, Royal Ontario Museum. Department of Ethnology, 1969      **Forgotten People, Forgotten Diseases** Peter J. Hotez, 2021-10-12 The neglected tropical diseases NTDs are among the most common infections of the world's poorest people and have profound ramifications on affected populations including physical, mental, social, and economic. This third edition of *Forgotten People, Forgotten Diseases* coincides with the third decade of the NTDs movement, which has given access to essential NTD preventative treatments and medications to more than 1 billion people. Professor Peter Hotez, MD, PhD, one of the founders of the NTD movement, discusses how the NTD space evolved and control was implemented against these ancient scourges through alliances between nongovernmental development organizations and private-public partnerships. *Forgotten People, Forgotten Diseases* also reports on the health and economic effects of the NTDs and the challenges of measuring diseases that do not always kill but adversely affect productivity, child development, pregnancy outcome, and economic development. Lays a roadmap for continued control of existing and newly identified NTDs and spotlights potential opportunities for reducing global poverty and repairing the world. Describes a global initiative to provide annual mass drug administration for more than one billion people affected by NTDs. Highlights the role of innovation and product development partnerships for new treatments and vaccines. Explains how science and vaccine diplomacy ensure that a new generation of biotechnologies reaches the world's poorest people. *Forgotten People, Forgotten Diseases* remains an essential resource for anyone seeking insight into global advocacy, coordination, and mobilization of resources to combat NTDs and continues to tell the story of the world's people who live in extreme poverty and what it means for them to live with these devastating diseases. Like Dr. Hotez, I have struggled with how to best get the word out about our need to address NTDs and their link to poverty. Now he has provided us all with a remarkable tool: a book for people without an extensive scientific or medical background. *Forgotten People, Forgotten Diseases* is an excellent one-stop primer about NTDs. *Dixie's Forgotten People* Wayne Flynt, 1979 Poor whites have been isolated from mainstream white Southern culture and have been in turn stereotyped as rednecks and Holy Rollers, discriminated against and misunderstood. In their isolation, they have developed a unique subculture and defended it with a tenacity and pride that puzzles and confuses the larger society. This book was one scholar's attempt to understand these people and their culture. google books      **Hunter-Gatherers of the Congo Basin** Barry S. Hewlett, 2014-05-23 The forest foragers of the Congo Basin, known collectively as Pygmies, are the largest and most diverse group of active hunter-gatherers remaining in the world. At least fifteen different ethno-linguistic groups exist in the Congo Basin with a total population of 250,000 to 350,000 individuals. Extensive knowledge about these

groups has accumulated in the last forty years but readers have been forced to piece together what is known from many sources French Japanese American and British researchers have conducted the majority of the research each national research group has its own academic traditions history and publications Here leading academic authorities from diverse national traditions summarize recent research on forest hunter gatherers The volume explores the diversity and uniformity of Congo Basin hunter gatherer life by providing detailed but accessible overviews of recent research It represents the first book in over twenty five years to provide a comprehensive and holistic overview of African forest hunter gatherers Chapters discuss the cultural variation in characteristic features of Congo Basin hunter gatherer life such as their yodeled polyphonic music pronounced egalitarianism multiple child caregiving and complex relations with neighboring farming groups Other contributors address theoretical issues such as why Pygmies are short how tropical forest hunter gatherers live without the carbohydrates they receive from neighboring farmers and how hunter gatherer children learn to share so extensively
