The Psychodynamics of Toxic Organizations Howard Stein, Seth Allcorn, 2020-05-06 Understanding experience at work especially in toxic organizations is a multidimensional undertaking that must include all senses The use of applied poetry has its primary value as an evocative approach to sensing knowing and understanding workplace experience Poetry at its best condenses into relatively few words metaphors and images what conventional social science narratives would take much longer to articulate Where poetry often hints and alludes narrative seeks to spell out expound and complete Where poetry leaves much mental space for the listener or reader to fill in with one's imagination narrative fills in the spaces with rich detail Applied poetry and its contextual stories offer a way of accessing workplace experience that is unique and valuable in terms of understanding lives at work The use of complementary psychodynamic theories like all theories is a way of trying to account for what we have found and experienced and in particular why it happened Why the authors suggest is critical in terms of understanding the sensing images and metaphors evoked by the poetry and stories that may resonate with hearers and readers for reasons that are unconscious and are rooted in the past These transferences that come forward from life experience into the present are the critical data we work with These are the data of psychoanalysis This book both widens and deepens the scope of organizational research offered by other researchers theorists and approaches to understanding interpreting explaining leading and consulting with workplace organizations Its triangulating integration of applied poetry experience and stories behind the poetry and the three psychoanalytic models of explaining life in workplaces is a new and distinct contribution to organizational research leadership and consulting efforts to help organization members solve real underlying problems and

not offer simplistic formulaic solutions based solely on a study of the organization's surface. It will be of interest to researchers, academics, and students in the fields of organizational studies, leadership, and management.

The Ecosystem of Group Relations Coreene Archer, Rachel Kelly, Gordon Strauss, Joseph Triest, 2023-02-16. The unconscious dynamics that surface in groups when authority is exercised are of paramount importance in Group Relations Conferences; this volume addresses these considerations through research findings and speculation on the future of Group Relations both within conferences and outside of them. This is the sixth instalment in a series of books based on Tavistock Group Relations Conferences and contains a collection of papers presented at the sixth Belgirate conference. Combining chapters on theory and practice, this volume delivers a meditation on the relationships between the physical spaces we inhabit or co-create, the psychic inner or spiritual space, and the liminal space in between. Group Relations provides a window of understanding into why inequity and intergroup hostilities pervade the modern world, alongside a method that illuminates how people consciously and unconsciously contribute to these tensions, whether personally in groups or in organisations. This will be an invaluable resource for practitioners, academics, and scholars of Group Relations, as well as managers and organisational members wanting to learn more about how Group Relations methods can contribute to their organisational success.

Dimensions of Psychotherapy, Dimensions of Experience Michael Stadter, David E. Scharff, 2005-09-16. Dimensions of Psychotherapy: Dimensions of Experience explores the three basic elements of psychotherapy: time, space, and number, summarising theory, setting it in context, and bringing concepts to life with clinical illustrations.

Building on Bion--Branches Robert M. Lipgar, Malcolm Pines, 2003. The enduring influence of Bion's work is the central theme of this book. Chapters by distinguished international contributors from the fields of psychoanalysis, group analysis, management consultancy, and social science cover work with large groups, Bion and the Tavistock conferences, and his ideas about thinking, learning, dreams, and mentality.

Counseling Across Cultures Paul B. Pedersen, Walter J. Lonner, Juris G. Draguns, Joseph E. Trimble, Maria R. Scharron-del Rio, 2015-01-14. Containing various perspectives on counselling individuals from cultures other than that of the counsellor or therapist, this book covers everything on cross-cultural counselling. Topics cover a broad range from basic issues in cross-cultural counseling and counselling in ethnocultural contexts to counseling individuals in transitional, traumatic, or emergent situations and counseling in the context of some common culture-mediated circumstances.
