Exploring Mathematics, 1996 **Exploring Mathematics** L. Carey Bolster, 1991 *Exploring Mathematics Through Literature* Diane Thiessen, 2004 This collection of articles and lessons provides classroom examples of how to use children's literature to teach mathematics effectively in prekindergarten through eighth grade. The articles focus on five content strands: number and operations, algebra, geometry, measurement and data analysis, and probability, and describe how the different authors have used specific books to help their students learn mathematics. Most of the articles involve communication, problem solving, representation, and reasoning, and some of them address connections. Helpful teacher notes indicate the grade range, topic, literature selection featured in the lesson, materials needed, discussion of the mathematics, and questions for students. Blackline masters of recording sheets are also included for most lessons.

Journey of Discovery Northwest Regional Educational Laboratory, United States. Department of Education, 1998 *Mathematics Unit Planning in a PLC at Work®*, Grades 6 - 8 Sarah Schuhl, Timothy D. Kanold, Jessica Kanold-McIntyre, Suyi Chuang, Matthew R. Larson, Mignon Smith, 2020-07-31 What exactly do your students need to know by the end of each unit of mathematics study throughout the school year? This practical resource empowers teacher teams to collectively plan for and deliver highly effective units of study in grades 6-8. The authors clearly outline how to generate essential learning standards, create a team unit calendar, identify prior knowledge, and complete many other essential collaborative tasks. Use this resource to provide intermediate grade-level students with a more equitable mathematics learning experience. Understand how to collaboratively plan mathematics units in grades 6-8 as a professional learning community (PLC). Study the seven unit planning elements and learn how to incorporate each in essential unit design. Review the role of the PLC at Work process in enhancing student learning and teacher collaboration. Observe three model units, one for each grade, for ratios and proportional reasoning. Receive tools and templates for effective unit planning.
