Continuation of the reference work that originated with Robert Dodsley, written and published each year which records and analyzes the year's major events, developments, and trends in Great Britain and throughout the world. From the 1920s volumes of *The Annual Register* took the essential shape in which they have continued ever since, opening with the history of Britain, then a section on foreign history covering each country or region in turn. Following these are the chronicle of events, brief retrospectives on the year's cultural and economic developments, a short selection of documents and obituaries of eminent persons who died in the year. *Fodor's Exploring Canada* Tim Jepson, 2001.

Generalized Linear Models with Random Effects: Unified Analysis via H Likelihood explores a wide range of applications including combining information over trials, meta-analysis, analysis of frailty models for survival data, genetic epidemiology, and analysis of spatial and temporal models with correlated errors. Written by pioneering authorities in the field, this reference provides an introduction to various theories and examines likelihood inference and GLMs. The authors show how to extend the class of GLMs while retaining as much simplicity as possible. By maximizing and deriving other quantities from the likelihood, they also demonstrate how to use a single algorithm for all members of the class, resulting in a faster algorithm as compared to existing alternatives. Complementing theory with examples, many of which can be run by using the code supplied on the accompanying CD, this book is beneficial to statisticians and researchers involved in the above applications, as well as quality improvement experiments and missing data analysis.
