**Getting Children Back to School** Vimala Ramachandran, 2003 In Indian context **Gender and Social Equity in Primary Education** Vimala Ramachandran, 2004-08-19 In recent years India has made impressive strides in increasing literacy rates and in enabling access to education The country now seems well set to provide universal and good quality basic education Yet behind this otherwise rosy picture lie serious concerns relating primarily to gender and equity This volume provides an insightful understanding of the ground realities of primary education programmes particularly those run by the District Primary Education Programme DPEP Combining secondary research with field studies conducted in six states the contributors explore gender and social equity issues in primary education They conclude that there is a subtle but nevertheless discernible hierarchy of access to education which has resulted in new forms of segregation in primary schools

Lessons in Educational Equality Jody Heymann, Adele Cassola, 2011-11-02 *Lessons in Educational Equality* details the concrete ways that all children can reap the benefits of a quality education regardless of gender ethnicity language income or learning difference It combines global research by leading innovators and unique case studies from three continents to find approaches that work at all levels of education *Inside Indian Schools* Vimala Ramachandran, 2018-03-05 After 70 years after independence the tragic reality of Indian schools is that who we are where we live how much we earn and our gender influences the kind of education we will get In this collection of essays the author explores the contours of a school system that is facing a crisis of legitimacy While India aspires to march towards a knowledge driven society and economy millions of young people are left behind Those who can afford march out of government schools only to realize that the private schools are no better The schools they attend leaves them with little knowledge or skill a very low self esteem and a bleak future This book argues that the struggle for equality in education is ultimately a struggle for quality both being two sides of the same coin Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

**Girls' Socialisation and Schooling** Pankaj Das, 2025-12-01 This book delves into the socialisation process in the distinctive spheres of the family community and school highlighting its unfavourable impact on girls schooling and their school life expectancy in India Through extensive fieldwork in selected tribal and rural areas in the Indian State of Odisha it carefully explores various dimensions of the disempowering process of socialisation in relation to schooling and dropping out among tribal other backward classes and scheduled caste girls This volume makes an important intervention in gender and education by focusing on the sociological implications of how education is gendered for girls It aims to explore the complexity of societal factors contributing to girls leaving formal education prematurely It examines the societal cultural and systemic barriers they face and how girls enrolled in a particular community construct their educational goals It also assesses the feasibility of those goals and addresses or overcomes the obstacles to completing their education especially in rural settings This book will make a significant contribution to the field by offering valuable insights to scholars in education gender studies

sociology anthropology development studies policymakers and anyone else interested in promoting gender equality in education It will also be crucial as it comprehensively explains the complexities surrounding girls education contextualised within the India s social and cultural context Anthropology and Child Labour D. South Asia Regional Office,2004 The future of India rests in the well being of her children across income group geographical location gender and community Ensuring that every child grows up in an environment conducive to her development is important for the country s overall progress and advancement The report argues for an integrated and life cycle approach to child development and basic education of children It finds that while India has in the

last few decades made considerable progress in ensuring child survival and basic education there is much that remains to be done The report illustrates using quantitative and qualitative data that such major indices of the Indian child s development as maternal mortality birthweight immunization nutrition level and basic education as also existing policy interventions for the child compare unfavourably with other developing countries In this context the report develops a conceptual framework for integrated child developing using case studies on the s ta tus of children in India It links the optimum delivery of services with an analysis of public expenditure on elementary education It takes a holistic and multi sectoral approach to child development focusing on the total child in the real life context of family community and existing social systems The report also prescribes specific guidelines to operationalize an integrated approach for ensuring the successful completion of universal primary education the best indicator of all round development of the Indian child Conceptualized and written by eminent early childhood development experts in consultation with noted Indian professionals this report is essential for social scientists scholars and researchers in the field of child development and childhood studies educationists policy planners and activists

Alcorn,2006 India, Democracy and Well-being Amarjeet Sinha,2005 This book is an attempt to understand the nature of India s political democracy and its implicatons for persistence of poverty and the failure in securing human well being for all in spite of five decades of freedom Policies of positive discrimination have surely contributed to making India s democratic experiment dynamic throwing up political leaders from all social groups and expanding and broadening the circle of elites or the powerful in society However the political mobilisation of the poor has as yet not translated into a rejection of hierarchial hegemonies that disregards and overlooks poor peoples s enlightenments to basic human well being as acess to education health livelihood food and social security by seeing human development and social oppurtunities as an inalienable fundamental human right of each and every individual **Alternative Schooling in India** Sarojini Vittachi,Neeraja Raghavan,Kiran Raj,2007-12-18 This book brings into focus the innovative methods of learning in many Indian schools It sheds light on schools that make the learning process fun for the teacher as well as the taught in contrast to the whirl of examination oriented learning in mainstream schools The researched data on alternative schools in the country offer the reader an array of institutions all over the country where efforts are being made to move away from traditional and mainstream learning It includes exclusive articles by leading practitioners in the field who offer an insight into the ground reality when a certain philosophy is applied to a school and also experiential accounts of how such alternative practices mould the learner teacher and impact the parent as well The book also consists of a directory of alternative schools in India including many schools that are tucked away in remote corners of the country Interestingly the common thread binding these alternative schools is concern for the welfare of the child by teachers who see their work as much more than a job **The Indian Journal of Social Work** ,2004
