# REPETITION

Repetition breeds consistency in a design. Once a design pattern has been established - for example, a button border or a specific typography styling - repeat the pattern to establish consistency. The short version: To create a style for each element in a design and use it on similar elements.

# PROXIMITY

Proximity allows for clear unity in a design. If two elements are related to each other, they should be placed in close proximity to one another. Being in close proximity allows related elements, organization, and increases viewer comprehension.

Imagine how ridiculous it would be if the proximity used on the graphic were located on the other side of the document.
