Exile at Small-Time U Douglas Higbee, 2025-07-18 This book is about what it's like to be a professor in the humanities at non elite universities and colleges. In a series of autobiographical snapshots from 19 full time professors from around the United States and two foreign institutions the present work explores the changes occurring at regional state universities and poorly endowed private colleges in the last several decades. These changes are a historical phenomenon as much as they are personally and professionally impactful. Through this set of first person perspectives on these changes readers will come to better understand the current state of the modern university. Current graduate students in the humanities undergraduates contemplating graduate school and their advisors will find their experiences and potential futures reflected in these essays.

Do Babies Matter? Mary Ann Mason, Nicholas H. Wolfinger, Marc Goulden, 2013-06-13 The new generation of scholars differs in many ways from its predecessor of just a few decades ago. Academia once consisted largely of men in traditional single earner families. Today men and women fill the doctoral student ranks in nearly equal numbers and most will experience both the benefits and challenges of living in dual income households. This generation also has new expectations and values notably the desire for flexibility and balance between careers and other life goals. However changes to the structure and culture of academia have not kept pace with young scholars' desires for work family balance. Do Babies Matter is the first comprehensive examination of the relationship between family formation and the academic careers of men and women. The book begins with graduate students and postdoctoral fellows moves on to early and mid career years and ends with retirement. Individual chapters examine graduate school how recent PhD recipients get into the academic game the tenure process and life after tenure. The authors explore the family sacrifices women often have to make to get ahead in academia and consider how gender and family interact to affect promotion to full professor salaries and retirement. Concrete strategies are suggested for transforming the university into a family friendly environment at every career stage. The book draws on over a decade of research using unprecedented data resources including the Survey of Doctorate Recipients a nationally representative panel survey of PhDs in America and multiple surveys of faculty and graduate students at the ten campus University of California system.
